HOW DO WE USE AI IN OUR WORK?

Tool / Approach

Co-Pilot / claude

AI agents

Zoom / teams / copilot / notebook

NotebookLM

Task → summaries → PVs.

E-Mails, Text (newsletter), Brainstorm

[Prep. before company visit, (research)
[Match student skills w/ services

- Ideation on topic already known (retrieve references)
  < starting point >
- Research
- Create Images → mock interviews

What works well?

- Reduce repetitive tasks
- Efficiency
- Writer's block
- ideation

Caution / Limitation

- ChatGPT Text with emojis (recognizable & irritable for viewers)
- Subscriptions
- Accuracy / Bias (Conf.) - Source validity
- Data protection / (Uni License?) (Remove Names before in system)
- Lack of Reproducibity

→ ↘ creativity? Do we become lazy?

→ pleasure in what we do?

HOW DO WE USE AI IN OUR WORK?

Tool / Approach

Gemini...

Career Dreamer (by Google)

Zoraç.io ai

DeepL

Claude ♥

Chat GPT (Sora for videos)

Tasks

Workshop Outlines

Career Counselling

Translation

Diff. feedbacks on the same topic

What works well?

Saves time

Optimised File search

you can create personas for different points of view

Speed

depth breadth

New ideas

Friendly :)

Caution / Limitation

Creation of visuals are horrible

Content too generic

Data security / US centric

lack of depth

lack of reflection

Sharing personal data

Loosing your ability to think

How do we use AI in our work?

Tool / Approach

1. Copilot
2. ChatGPT
3. Claude
4. Perplexity
5. Consensus
6. Gemini

Task

Write newsletters (1)

Prepare for interviews (1)

Complement your brainstorm (1)

build a rag (AI w/ limited data)

What works well?

- find new ideas
- rearrange / restructure existing information

Caution / Limitation

Ethics about AI

Critical Thinking -> use it as a tool and not a replacement of your work

Limited information (database)

Be smarter than the system in order to control it :)
