

Swiss Graduate Jobmarket Monitor

Indicator J – Job Ads

This indicator monthly measures the published job ads on the platforms of 15 Career Services of Universities & Universities of Applied Sciences in Switzerland. The focus is on tracking job ads for graduates, e.g. career entry positions, traineeships, internships etc.

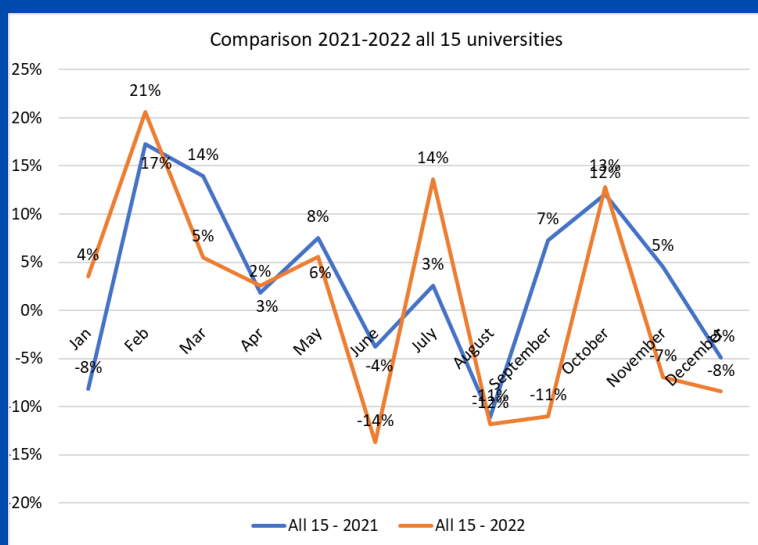

Development overall

The quarter began with a slight increase in October, with 2215 job ads being posted, compared to 1798 in October 2021. However, the job market saw a decline in November and December and for the first time the numbers went lower than last year. Despite this decline, the overall number of job ads posted in Q4 of 2022 was higher than in Q4 of 2021.

Monthly comparisons

The last quarter of the year started with a +24% recovery between September and October 2022. However, in November, there was a 12% decrease in job ads compared to 2021 which has been reduced in December. Overall, the numbers followed the same patterns than last year in the 15 universities with variations in different scales.

Change in job ads compared to previous month per university 2021/2022

From university to university

While the university-to-university comparison confirms a significant difference between the number of job ads published each month by Career Services, it also shows an overall positive growth rate in October. November faced then more than 50% of the Career Services with a negative growth rate.
